ABOUT THE MATERIALS IN THIS FOLDER –
MATH SKILLS FOR SCIENCE: MEASUREMENT

This unit can be integrated within the 5 units of this curriculum throughout the year, or taught all at once in the beginning of the year or in math tutorials outside of regular class time.

３ documents are included and a fourth will be available in 2007. These materials are designed to be done in sequence, from 1 dimensional concepts in measurement to 3 dimensional concepts.

３ They can be done in short lessons throughout the year, perhaps on the same day each week. If you believe all students have a firm grasp of the fundamentals, these lessons can be done separately from one another. However, many students in Hawai‘i appear to understand the fundamentals in their paperwork, but cannot perform tasks. These materials give them the hands-on practice they need to truly “get it”!

Please let us know if you have any revisions or additional ideas to add to this folder! Mahalo!

😊
