**Flora & Fauna: Concept Organizer**

**Directions:** Look at the chart below. The top balloon gives the main idea. Below this, the next 3 balloons give 3 important points (of course, they are wrong!). On the lowest level, many boxes can be added to give details which support the important points.

![Diagram of How Plants Came to Hawaii]

Make a chart like the one above (but bigger) on the back of this sheet. Put the same main idea in the top balloon, but write the correct answers in the other balloons and add the details you've learned in recent lessons.
