Final project: orally present an environmental issue/concern.

Project Requirements
- Select an environmental issue
- Do research to obtain information for the following:
  - Define or explain the issue
  - Is it a local and/or global concern
  - Who or where does it affect
  - Why is it a problem or concern
  - How did this issue surface or come about
  - How long has it been occurring
  - What are the short and long term effects
  - What impact is it making on the environment
  - Who is responsible
  - Give examples of the issue (ex: car fuel - companies use corn to make fuel)
  - What is being done to resolve this issue locally and/or globally
  - What should be done about this issue
  - What is your personal commitment to this issue
- Use note cards with outline
- Speak clearly and audibly with appropriate pace and speed
- Use complete sentences
- Make eye contact with audience
- Capture audience with interesting opening
- Delivery should be clear and logical
- Include an introduction, development of ideas, and conclusion

Note cards due: ________________________________
Presentations: ________________________________
Possible Topics:

Air quality
Water quality
Marine debris
Litter
Landfills
Paper production
Recycling
Endangered species
Petroleum based fuel
Forests
Introduced species
Styrofoam
Ozone depletion
Global warming
Mining
Land development
Commercial pesticide use
Food Safety
